

Benefit Recalculation Event – How to Add to Ariel Records

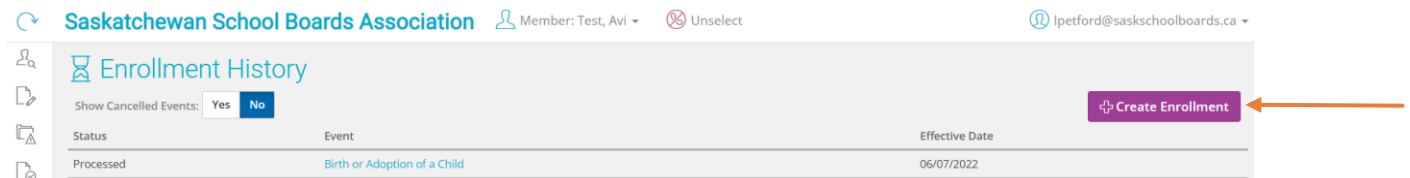

The Benefit Recalculation Event triggers the Ariel system to apply the annual benefit premium rates. Each year prior to September 1st, TELUS Health adds the Benefit Recalculation Event to every active employee. If this event is missing, it can be added by using the following instructions:

IMPORTANT: Plan administrators will need to add the Benefit Recalculation event for all New/Rehired employees entered into Ariel after Sept. 1st with a hire date prior to Sept. 1st. The New Hire/Rehire event must show a status of Processed in order to add the Benefit Recalculation event.

1. Under the employee's Ariel record, click on **Enrollment History**

2. Click on **Create Enrollment**

3. Scroll down and select the **Benefit Recalculation** event. Apply an effective date of Sept. 1st of the current year and click **Save**.
